COMMUNITY SERVICES BOARD REPORT MAY 25, 2023

As we enter into the summer season, our Environmental team will be conducting lodging inspections and Summer Food Service Program Inspections.

- We typically start lodging inspections after Memorial Day due to the opening of the outdoor pools. While in the facility we conduct sanitation, electrical and fire safety inspections.
- The Summer Food Services Program, a Missouri Department of Health and Senior Services (MO DHSS) program, provides reimbursements to schools and other community agencies to ensure children 0-18 have nutritious meals during the summer break. Our role in this program is to conduct food facility inspections.

JCHD Vector Control program.

- We will begin spraying mosquito adulticide throughout unincorporated Jefferson County this week.
- The chemical we use kills the adult mosquitos and is sprayed from the back of agency trucks at a low speed, approximately 10 miles per hour. If you see the trucks going down the road at normal speeds, we are not actively spraying.
- We do have a contract with some of the smaller municipalities to conduct mosquito spraying within their city/town limits.
- Our spray crew begins spraying late in the evening, around dusk. This offers the best application of the spray product and ensures residents are not within the direct spray.
- We have a form on our website and app for unincorporated residents to request us to spray in their area.
- We will also be conducting mosquito surveillance. This is a process of trapping/catching mosquitoes throughout the county. Once we collect them, we have equipment in our vector lab that can detect if any of the mosquitoes are carrying the West Nile Virus.
- West Nile Virus is transmittable to humans, through mosquitos. If we receive positive results, we will issue a press release and increase spraying for that area.
- This program also works closely with our Communicable Disease Team. If a resident of Jefferson County tests positive for West Nile Virus, we will increase mosquito spraying and surveillance around their home.

Communicable Disease cases are increasing as the weather warms up. (See the Communicable Disease Monthly Report)

- It is tick season, be sure to protect yourself, your family and your pets from ticks. Ticks, like mosquitos, carry viruses and bacteria that make us sick. Such as: Rocky Mountain Spotted Fever, Lyme-like disease, and ehrlichiosis.
- Proper food handling and storage and good hand hygiene is important to reduce foodborne illnesses. The typical "food poisonings" include e. coli, campy and salmonella. We do see an increase in cases as friends and families gather for barbeques and picnics.

Summer is fair and festival season.

- You will see our Environmental Public Health Specialists (EPHS) out conducting site inspections for Farmers Markets, temporary food event vendors and food trucks.
- Our Health Education Team will be providing information on healthy lifestyles, nutrition, the dangers of vaping, lead education, at times will have bike helmets and fittings available,
- Our Adult Brain Injury and Children with Special Health Care Needs Service Coordinators will also be at special events offering program information and resource recommendations.

Communicable Disease Prevention-Capacity to prevent and stop the spread of disease through strategies such as surveillance, investigation, education, and interventions.

Associated JCHD Programs

- Public Health Emergency Preparedness (PHEP)
- Cities Readiness Initiative (CRI)
- Epidemiological and Laboratory Capacity Enhancing Detection Expansion (ELC-EXP)
- Communicable Disease Investigation
- Vector Control and Animal Bites
- Not all cases investigated are considered "confirmed" or "probable". Those cases that do not meet specific case definition will be classified as "suspect" or "no case". This chart represents all cases investigated. For a full list of only "confirmed" or "probable" cases see the monthly JCHD Communicable Disease Report.

Injury Prevention-Capacity to analyze trends, research causes, develop strategies, and create policies in order to reduce preventable injuries.

Associated JCHD Programs

- Overdose to Action (OD2A)
- National Association of County and City Health Officials (NACCHO) Implementing Overdose Prevention Strategies at the Local Level (IOPSSL)
- Car Seats
- Youth Bike Helmets
- Project Lifesaver
- Drug Prevention Coalition partnerships
- Vaping education and resources

Maternal, Child, and Family Health-Capacity to address conditions that affect health behaviors among women, support family health, and ensure children the healthiest start in life.

Associated JCHD Programs

- Maternal Child Health (MCH)
- Child Care Health Consultation (CCHC)
- Children's Health Insurance Program (CHIP) Health Services Initiative (HSI) - School Health
- Teen Coalition

Environmental Public Health-Capacity to reduce harmful exposures and foster safe and health environments that protect communities.

Associated JCHD Programs

- Food Program
 - Jefferson County Food Code
 - Food and Beverage Permits, Temporary Permits, Farmers Market Master Training, and ServSafe Certifications
- Water Sample Laboratory Services
 - Private and Public Water and Wells
- Childcare Sanitation Inspections (CCSI) - childcare facilities
- Superfund Lead Health Education and Voluntary Institutional Control Programs (Superfund Lead)
- Environmental Implementation of Grading System and Advancement on Conformance with Program Standards (GSAC)
- Summer Food Services Program (SFSP)
- Children's Health Insurance Program (CHIP) Health Services Initiative (HSI) -Lead
- Lodging

Chronic Disease Prevention-Capacity to work with community partners to share information, develop polices, and create environments that prevent chronic diseases and support chronic disease management.

Associated JCHD Programs

- Health Education
 - Weight Loss, Diabetes, Heart Disease, Hypertension, Digestive Disorders, Good Allergies, Pediatric and Adult Nutrition, Group Nutrition Counseling
- Public Health Advocacy

Linkage to Medical, Behavioral, and Community Resources-Capacity to develop a strong network of partners with diverse expertise and resources to build a strong foundation for community health.

Associated JCHD Programs

- Adult Brain Injury Program Service Coordination (ABI) Missouri Regions F and G
- Children and Youth with Special Healthcare Needs Service Coordination (CYSHCN) Missouri Regions 10 and 11
- Local Public Health Disparities Initiative (LPHDI)

Champion positive health outcomes and behaviors through innovative programs and community engagement

Communicable Disease Surveillance Summary Report Jefferson County, Missouri

April 2023

NOTES ON THE DATA:

- All data and information are conditional and may change as more reports are received.
- Case definitions are established by the Missouri Department of Health and Senior Services' (DHSS) Communicable Disease Investigation Reference Manual. The totals reflect the number of confirmed and probable cases reported; suspect cases are not included.
- Data is reported in epidemiologic weeks established by the CDC's Morbidity and Mortality Weekly Report (MMWR). The MMWR week starts on a Sunday and ends on Saturday. Values for MMWR week range from 1 to 53, although most years consist of 52 weeks. The 2023 MMWR calendar began on January 1, 2023.
- Case date may be based on the onset date, diagnosis date, specimen date, or test date.
- Excluded from this report are Sexually Transmitted Diseases, Influenza, and COVID-19.
- Jefferson County Health Department monitors all reportable disease cases year-round. Figures 1. and 2. include detailed views of diseases or conditions that may be of importance during the time of year this report is published. Variables such as outbreaks or the seasonality of communicable diseases may affect the number of cases per month and call for a more in-depth look. Seasonal change in the incidence of infectious diseases is common.

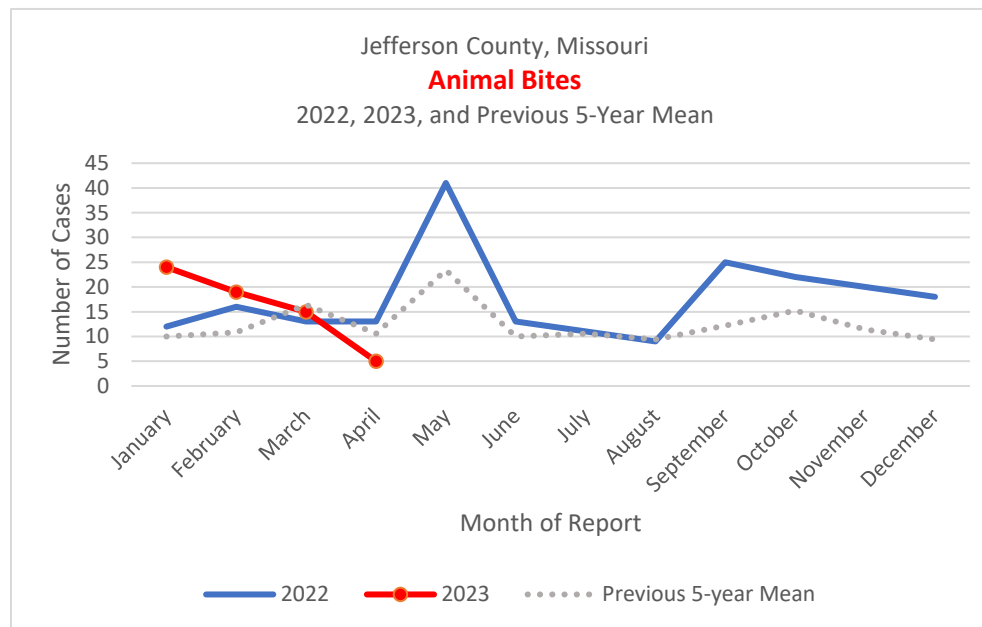

**Figure 1. Campylobacteriosis
Jefferson County, Missouri**

Campylobacter infection, or campylobacteriosis, is caused by Campylobacter bacteria. Campylobacteriosis is one of the most common causes of diarrheal illness in the United States. There are 21 Campylobacter species; however, Campylobacter jejuni and Campylobacter coli are the two species that most often infect humans. Almost all persons infected with Campylobacter recover without any specific treatment. Antimicrobial therapy is warranted only for patients with severe disease or those at high risk for severe disease, such as those with immune systems severely weakened from medications or other illnesses. There were 4 cases of Campylobacteriosis reported during April 2023 in Jefferson County. During the previous 5 years, the number of cases has ranged from 0 to 8 per month. A year-to-date alert has been noted for Campylobacteriosis. Year-to-date alerts are present when the total cases in the current year are more than one standard deviation above the mean for the same time period in the previous five years.

**Figure 2. Animal Bites
Jefferson County, Missouri**

The potential for zoonotic (animal-to-human) transmission of disease must be considered in any situation where a person is injured by an animal. Animal bites are a major mechanism of pathogen conveyance. In considering the likelihood of disease transmission, many factors must be assessed, such as the species of animal, type of injury, severity of injury, vaccination status of animal and/or human (when applicable), time between incident and treatment, and various attributes of the injured person (age, underlying health, etc.). An “Animal bite wound” is defined as breaking of the skin by the teeth of an animal. Only bites from mammals are reportable in the state of Missouri. There were 5 animal bites reported during April 2023 in Jefferson County. During the previous 5 years, the number of reported animal bites has ranged from 0 to 41 per month.

May 25th, 2023

ASPEN Coordinator, along with two key ArchitectNOW staff will be presenting a detailed demonstration of ASPEN. This demonstration will include the following.

- Introductions of ASPEN and ArchitectNOW staff
- Brief overview of the history
- Demonstration of the Resource Directory
- Demonstration of the Parent Agreement and Options
- Demonstration of the Student Options
- Demonstration of School Staff Options
- Demonstration of the 24/7 Crisis Counselors Option
- Demonstration of the Frist Responder Options
- Demonstration of Administration Options
- Demonstration of the Incident Response Options
- Questions

Communications & Marketing

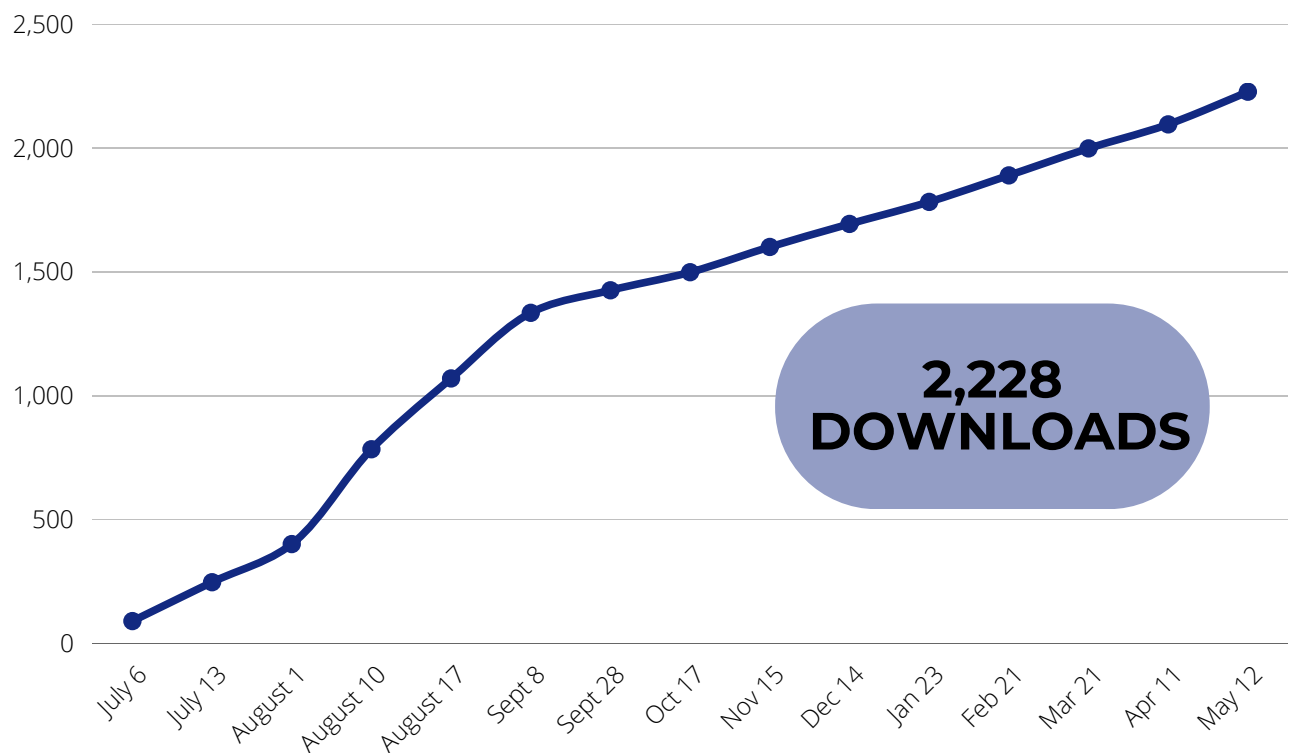

Monthly Report- May 2023

Analytics from April 2023

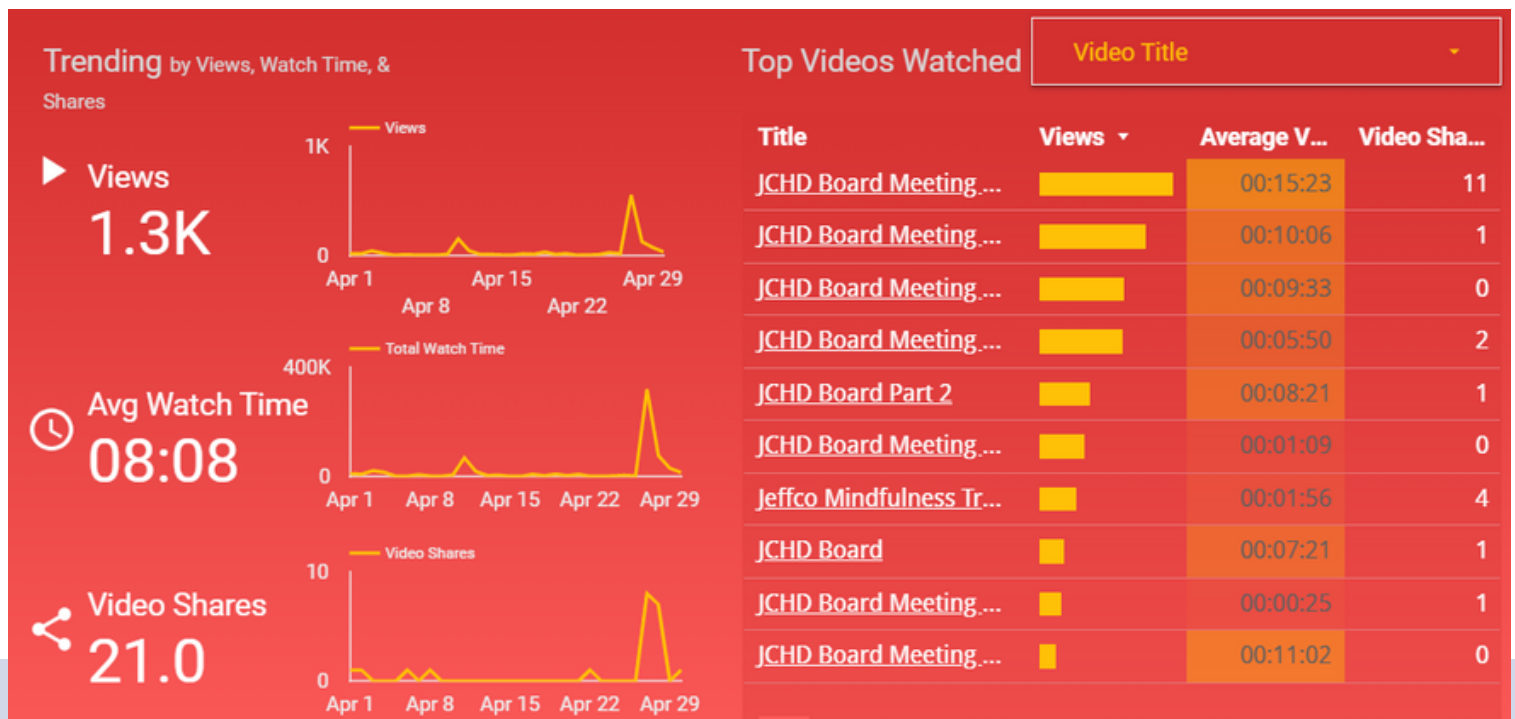

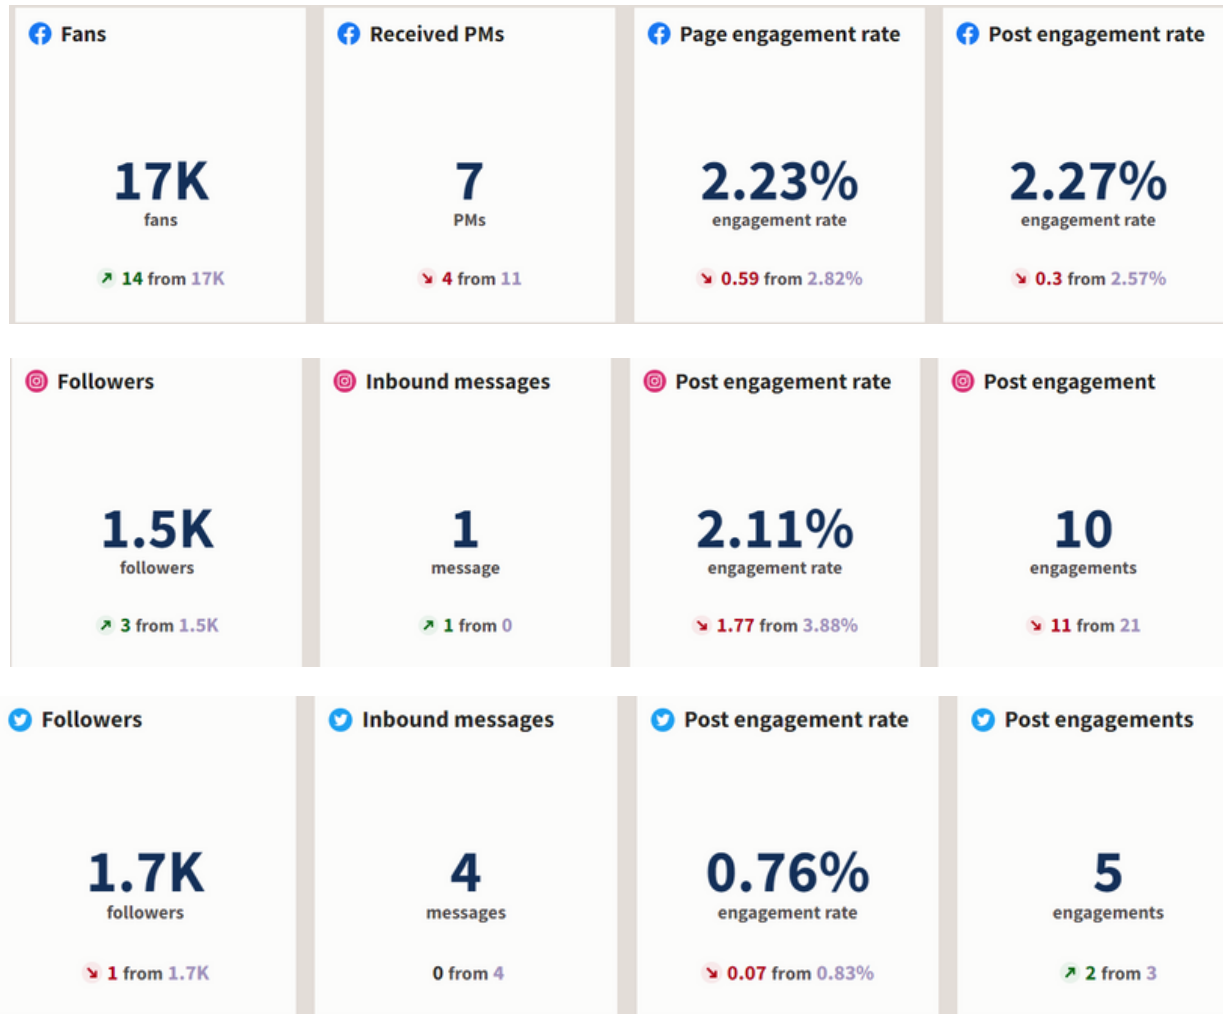

Updates

- Current communications projects we are working on:
 - Lead Campaign
 - Creating community education materials about lead contamination areas and activities in the county
 - Monsido and accessibility
 - Website updates
 - STD Education and Clinic Events
 - Communicable disease education
 - Vector Education: mosquitoes, ticks, prevention, etc.
- Community event season is coming up and JCHD will be attending a lot of events and fairs over the next several months providing services and education
 - Desoto Bike Rodeo
 - Senn Thomas Career Expo
 - Jeffco Family Fun Day
